

NLP session 08: Preparation for next session

- Make sure you have downloaded all the DailyMail data
- Do steps (1) - (3) from the green box at the end of the session 08 notebook. If you do not manage to implement a Rouge-2/Rouge-L evaluation-function –or don't have the time– download a package that does this for you (but make sure to understand how to use it)
- Conceptually: Sketch out how to implement a TF-IDF summarization model. What steps do you need to follow?
